Markus Persson

This man, with his black hat, black T-shirt and thick beard is a young millionaire who lives in Beverly Hills, California.

Do you recognize him now?

He is Markus Persson, also known as "Notch". He is a 37 year-old designer and video game programmer. He is the creator of Minecraft, a popular game that has become an international success.

When he was a child he loved playing Legos but at the age of eight his father bought a computer and his life changed. The first time he programmed a video game he was only eight!

Minecraft was done in just a week, and it is inspired by Legos and the forest that was next to his village. Now Markus Persson is considered the first superstar computer game developer.

But why is Minecraft so popular?

There are many reasons. The first one is that Minecraft is a digital Lego game. You can build all that you can imagine. The second is that it's free, it hasn't got a specific objective, and the third reason is that it is a cheap game.
